

Press Release

For Immediate Release: 28/June/2007 10:05 AM

New Business News:

Canberra, Australia - Mi-Trek (www.mi-trek.com/) announces that it has won a customised Fleet Management contract with Main Roads Western Australia. The first phase of the installation is now complete. The application required customising Mi-Trek's proprietary firmware to provide accurate 2 second position vehicle location with scheduled automatic uploads to the mi-Trek Internet accessible database. This type of journey reporting allows frequent data collection to be managed in an accurate and cost effective manner.

Mi-Trek was selected in a competitive tendering process for its proven ability to customise Fleet Management applications, as well as for its unique system that ensures accurate operation under rugged Australian conditions.

Mi-Trek Pty Ltd, is an Internet based Fleet Management company, which is a wholly owned subsidiary of Hindmarsh and currently operates Australia-wide and in New Zealand. General Manager, Mr. Michele Troni says the company is in the process of expanding internationally.
